Upgrgrade the way of living

## WHAT POSITIVE OR IMPRESSIVE ELEMENTS DOES IT HIGHLIGHT?

- »» **a human-centered lifestyle :**  
all essential services => accessible within a five-minute walk
- »» **an environmental sustainability :**
  - 100% renewable energy
  - zero carbone emission
  - Protect 95% of the surrounding environment
- »» **an economic importance :**  
part of Saudi Vision 2030

# REALITY CHECK

## ECONOMICAL LIMIT :

- Its cost has **risen**.
- The city has decreased from **1.5 million residents to 300,000**.

Designed to accommodate **1.5 million people** by the year 2030, projections **now suggest the city will only be home to** around 300,000 residents, and the overall length of the city has also been reduced to 2.5 km.

## HUMAN RIGHTS PROBLEM :

- Forced eviction of the Howaitat tribe =>
  - arrests,
  - prison sentences,
  - death sentences.

Scrutiny intensified when construction began in October 2022, and reports emerged about the Saudi government issuing **death sentences** and **lengthy prison** terms to six members of the Howaitat tribe;

## ENVIRONMENTAL CONTRADICTION :

- Huge ecological damage => the energy and materials required.

An aerial photograph of a coastal region. A prominent white wall or barrier runs across the top of the frame. Below it, a large body of water is visible, with several sailboats scattered across its surface. In the foreground, a bay or inlet is filled with water, also containing several sailboats. The land is a mix of brownish soil and green vegetation. The overall scene is captured from a high angle, providing a comprehensive view of the coastal layout.
